

Dear parents,

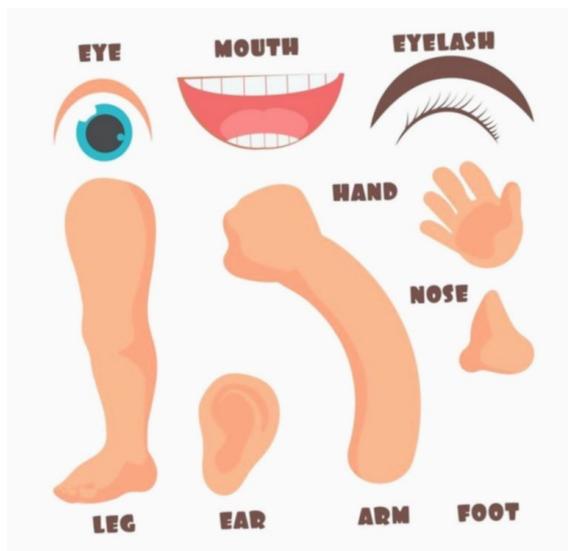

Welcome to our March newsletter. The topic of the month is "The Body".

This month our children will talk about their body and the parts that make it up.

They will learn new words to identify the internal and external parts of their body.

We aim to show them how they can take care of their body, (self-hygiene activities) and practise how to move their body safely, especially with other children through different activities.

Also, we will encourage them to experiment with different ways of moving to improve their moving and handling skills.

Baby activities

Our babies this month will explore their body through various art and craft activities. We will support them by using body flashcards in the magic box and sing some familiar songs like "head, should knees and toes" to improve their communications skills.

They will celebrate Holi festival by mixing all the different colours with different attractive activities.

To introduce the new season "Spring" our babies, they will visit the park to collect natural objects, like plants, lives, flowers etc. and explore them.

The teacher will make an amazing

Tweenies/Preschool activities

Our tweenies and preschool children will explore the new topic in different ways: Drawing their body parts, using various creative materials.

They will use their imagination, playing and pretending to be a doctor, a nurse or patience in our Hospital in the home corner.

Writing or tracing the names or fist letter about body parts.

Listening and having a role play about the story of the month: Jack and the beanstalk, also they can link it to the math concept...who is the tallest in the room? (the Giant) Who is the shortest? (Jack)

Mother's board with the "special support from our babies" to celebrate the mother's day for our super mums.

They will enjoy celebrating Holy and mix different colours through body painting and other fun activities.

They will talk about their mums and draw a photo for them to give their contributions to the "mother's day board."

Mother's Day

Can you kindly email us a photo with mum and child to help us to make a lovely Mother's day board?

Unfortunately, under the current circumstances, we have to postpone our Mother's day tea party to further notice due to coronavirus, as the best way to minimise the spread is to avoid having a massive gathering in the nursery.

Nevertheless, all our mums will receive a lovely surprise from their child(ren).

Holi

On the 10th of March, we will celebrate Holi.

Holi is an Indian festival, and it is the festival of colours.

On this occasion, our children will explore and mix colour powder and paint colours through "body activities."

Could you kindly bring a white t-shirt that the children can use for Holi activities?

World Book Day

On the 18th of March, we will celebrate "World Book Day". All children can dress up as their favourite book characters.

Dentist appointment

According to the topic of the month, on the 19th of March

NHS dentist will come to the nursery to have a dental examination for our children.

If you are interested in, please make sure you give us back the consent form on time.
